What is Extreme Heat?

In the summer a combination of high temperatures and high humidity can cause extreme heat. People suffer heat-related illness when their bodies are unable to properly cool themselves.

Heat-Related Illness

Extreme heat can lead to severe illness and even death. Heat-related illnesses include:

Heat rash: a skin irritation that looks like a cluster of small blisters. It is caused by excessive sweating during hot, humid weather.

Sunburn: the skin becomes red, painful and abnormally warm after sun exposure. Severe sunburns may require medical attention.

Heat cramps: muscle pains and spasms are often the first sign the body is having trouble coping with the heat.

Heat exhaustion: heavy sweating, headache, dizziness, fainting, nausea and/or vomiting are all signs of heat exhaustion.

Heat stroke/Sun stroke: signs include hot, red skin, rapid weak pulse and shallow breathing. Skin may be wet if person was sweating from strenuous activity, otherwise it will be dry; possible unconsciousness. This is a severe medical emergency.

Beat the Heat

Safety tips for keeping yourself, your family, and your pets safe during extreme summer heat

El Dorado County Emergency Preparedness & Response

Who is at Risk for Heat-Related Illness

- People aged 65 and older
- Infants and small children
- People who are ill or are taking certain medications
- People with chronic medical conditions
- People who exert themselves during work or exercise
- Outdoor workers
- Pets and other animals

During an extreme heat event:

- Check on at-risk friends, family, and neighbors at least twice a day and have them check on you, too
- Wear loose, lightweight, light-colored clothing
- Stay hydrated; don't wait until you are thirsty to drink
- Stay informed
- Stay cool

Family
Preparedness

Individual Preparedness

Building Disaster Resilient
Communities Starts With You!

Indoor Safety

- Take cool showers
- · Avoid eating heavy meals
- Stay in air-conditioned areas as much as possible
- Avoid using the stove or oven to cook

Outdoor Safety

- Avoid strenuous activity on hot days
- Never leave anyone, including pets and children, in a parked vehicle
- Limit exposure to the sun

Remember Your Pets

- Make sure your pets and animals have plenty of fresh, clean water and a shady place to get out of the sun
- Avoid burns on paws from hot asphalt or pavement; keep activity to a minimum during the hottest part of the day
- Know the warning signs of overheating in your pets, including: excessive panting, drooling, weakness, increased respiration
