

Water Resources Development and Management Plan 2024 Update

## **Water Supply-Demand Imbalance Subgroup Tahoe Basin Meeting**

August 19, 2024: 11:00 - 11:16 via MS Teams

### **Participants:**

Adiran Combes, South Tahoe Public Utility District

Matt Homolka, Tahoe City Public Utility District

Rebecca Guo, El Dorado Water Agency

Sean Barclay, Tahoe City Public Utility District

Yung-Hsin Sun, Sunzi Consulting

### **Summary:**

This was a follow-up meeting with the public water purveyors in the Tahoe Basin for the water supply-demand imbalance assessment. Yung-Hsin provided a recap about 2019 discussion and reliance on an ongoing study conducted by KJ for the pending SWRCB water right proceeding. There has been some progress on SWRCB's water right proceedings. The overall situation did not change from 2019 with no projected imbalance. The group recognized that the KJ study was completed for STPUD, TCPUD and North Tahoe PUD (one report) in 2020 based on the regulatory and demand projections at that time. An update is under consideration for TCPUD and under way for STPUD. STPUD/TCPUD will provide the final KJ report to EDWA for reference and use in the WRDMP24.
